PROJECTS

Project Name — Voting System

The voting system project was developed to facilitate secure and efficient voting processes for a society primary election. The system aimed to provide a user-friendly interface while ensuring data integrity and confidentiality throughout the voting period.

Project Name — Codeweb

www.codeweb.com.ng

I crafted the frontend design of the school website using the coding skills I've acquired. This platform is tailored to provide students with an intuitive and interactive learning experience.

Project Name — Movatti

https://github.com/Oluwasuyi-Timilehin/Movatti

Movatti is a comprehensive movie discovery platform featuring personalized recommendations, search functionalities, and an intuitive interface aimed at enhancing user experience in exploring diverse movie genres and preferences.
